

The Fun Lab

Engineering & Project Management

Seriously fun projects

About The Fun Lab

We are a consulting and engineering firm specialized in water parks, aquatic leisure facilities and recreational pools.

Additionally, we are an independent international inspection entity accredited by the ISO/IEC 17020 standard, qualified to inspect and certify the safety of water leisure areas in accordance with current European EN and American ASTM regulations.

Our Mission

At The Fun Lab, we have the mission of contributing to ensuring that our clients have safer, more efficient, and innovative water leisure spaces.

About us

Worldwide partners of the tour-operator TUI as **technical advisors and safety auditors for water leisure facilities** and pools at their operated resorts.

Our Proposal

We have developed a unique working formula, based on the three fundamental pillars that support our mission: comprehensive project management.

We work flexibly to adapt our services to the specific needs of each client, being able to carry out a comprehensive project from scratch, as well as working only on those parts that the client wishes to outsource to a specialized team.

Services

Consulting – Project management

Technical consulting for new project conceptualization · Operational safety advisory for water leisure areas · Purchasing consulting · Academic training and maintenance plans

Services

Engineering

- Drafting and endorsement of projects
- Structural calculation studies for slide platforms
